

Dwyer Case History

Project Name: Cincinnati Credit Union

Owner / G.C.: EGC Construction

Project Type: Micro-Pile Installation using Man Portable Rock Drill

Location: Cincinnati, OH

Project Description:

Dwyer designed and installed 6 micro-piles (40' depth), using a Man Portable Rock Drill, inside the bank where limited access and clearance was an issue. Dwyer successfully stabilized and leveled the 3 column footings. Dwyer then pressure grouted under the floor slabs, and the footings to fill the voids and raise the slab. The job was completed on April 15, 2005.

Micro-Pile Installation using Man Portable Rock Drill
