

Dwyer Case History

Project Name: Panini's Bar & Grill
Project Type: Scarifing, Diamond Grinding, Self-Leveling Topping, Epoxy & Urethane Coatings
Location: Columbus, OH

Project Description:

Dwyer used the process of scarifing and diamond grinding to prep the surface of the concrete floor. Then self-leveling toppings were applied to 2,500 sq ft on the main floor. Dwyer also applied an epoxy coating system to 1,500 sq ft on the 2nd floor.

Dwyer Case History

*Scarifing, Diamond Grinding, Self-Leveling Topping,
Epoxy & Urethane Coatings*
